Introduction

Dear Colleagues,

It' is with great pleasure that I can introduce the third issue of our publications catalogue with our EUROSIS-ETI publications. Added to last year's issue are the publications of 2010 and the first six months of 2011. Thus the catalogue covers the period 2003-2011. The cover celebrates the meshing of gaming and simulation which is becoming more and more important in present-day research and is artwork which survived from Outcast 2, a game alas which was never made by Appeal, a now defunct Belgian game company.

The proceedings are available as:

P.V.: Printed Version

E.V.: Electronic Version for download (consists of cover file, first pages file, contents file and all scientific contents, all files are in pdf format)

P.O.D.: Printed on Demand (when the book is **SOLD OUT***, we can still produce a printed copy on request).

The contents pages of all publications can be downloaded from:

<http://www.eurosis.org/cms/index.php?q=taxonomy/term/58>

Some of the papers published in the proceedings have been re-published in a number of scientific journals, a listing of which can be found in this catalogue. All conference proceedings are copyrighted by EUROSIS-ETI Bvba, and are [ISI-Thomson](#) and [INSPEC](#) referenced. Papers from ISC can also be found at the [Loughborough University Repository](#). and from ESM at the Imperial College E-Repository. (link [1](#) and [2](#))

From now on all EUROSIS proceedings also have as their legal repository the [Royal Library of Belgium](#), where they are registered under CIP number 12.620.

Furthermore, a membership form has now also been included at the back of this catalogue so you can enjoy the publications at our membership prices.

Keeping with tradition, this year's catalogue also has a special offer package for the EUROMEDIA Proceedings, more on **page 33**.

Simulation and Modelling

Proceedings on the following pages come from the ESM (European Simulation and Modelling Conference), MESM (Middle Eastern Simulation Multiconference), NASTEC (North American Simulation Technology Conference) and ASTEC-GAMEON-ASIA (Asian Simulation Technology Conference) which deal mostly with general simulation methodology and tools

ESM'2010

October 25-27, 2010, Hasselt University, Hasselt, Belgium
 Edited by Gerrit K.Janssens, Katrien Ramaekers and An Caris

Blue and Grey cover, Softbound, 463 pages, [Contents](#)  ISBN 978-90-77381-57-1

Covers Simulation Methodology, Comparative Simulation, Models, Languages and Tools, Data Analysis Tools, Network Simulation, Electronics Simulation, Complex Software Systems Simulation, Economics Simulation, Management Simulation, Health Care Management, Transport Infrastructure Layout Design, Intermodal Transport, Transport, Logistics, Supply Chain, Fluid Flow, Environmental Simulation and educational Simulation

EUROSIS was borne out of discussions with the European Community to set up a new kind of Society, which would be project-driven instead of driven by pure membership and conferences.

The aim of EUROSIS is to set up topic related Technical Committees which will link directly to European Projects in the field of computer simulation and related areas and to act as a knowledge pool for future European Networks of Excellence, like MOSAIC.
