SPECIAL ISSUE TITLE

Simulation Modelling in Engineering Systems: Techniques and Applications

PAPERS

Applying BCMP Multi-Class Queuing Networks For The Performance Evaluation Of Hierarchical And Modular Software Systems
Balsamo, Rossi & Marin

Harnessing Aspect Oriented Programming on GPU: Application to Warp-Level Parallelism (WLP)
Passerat-Palmbach, Caux, Schweitzer, Siregar, Mazel & Hill

Avoiding Redundancies in the Proxel Method
Buchholz, Krull & Horton

Modelling and Simulation of Several Interacting Cellular Automata
Pla-Castells, García-Fernández & Martínez-Durá

Implicit And Explicit Techniques For Localized-Incremental Forging Processes Analysis By Computer Aided Engineering
Camacho, Marín, Bernal & Sebastián

Forklift Free Factory: A Simulation Model To Evaluate Different Transportation Systems In The Automotive Industry
Bauters, Govaert, Limère & Van Landeghem

Utilisation Of Computer Simulation For Testing Additional Support For Dispatching Rail Traffic
Fikejz & Kavička

An Exact Algorithm For The Full Truckload Pick-Up And Delivery Problem With Time Windows: Concept And Implementation Details
Janssens & Braekers

Equipment's Role On The Drying Process Of Chestnut (Castanea sativa Mill.) Fruits
Lamas, Ramalhosa, Morais

Risk Of Salmonellosis From The Consumption Of Irish Fresh Pork Sausages
Gonzales-Barron & Butler
