

Preface	VII
Scientific Programme	1
Author Listing	123

INDUSTRIAL EXPERIENCE WITH MODELLING

Role of Modelling and Model Simulation in Food Industry; a Dairy Case Anton Sweere	5
Advances in the Optimization of Industrial Food Processing Julio R. Banga, E. Balsa-Canto, C. G. Moles, S. Garcia, O.H. Sendin, M. Rodriguez and A.A. Alonso	10
Optimisation of Heat Treatment of Milk Rudy de Wit and Hans Nieuwenhuijse.....	15
Process Modelling and Optimisation in IICI for Applications in the Food Sector Tom Malik and Chris Wink.....	20

SIMULATION OF PROCESSES AND PRODUCTS

On the Use of CFD Modelling in Fluidised bed reactor Design Frédéric Depypere, Jan G. Pieters and Koen Dewettinck	23
Mathematical Modelling of Dough Development during Fermentation Process Paolo Masi, Annalisa Romano, Gerardo Toraldo and Marina Marino	28
Bread Chilling with Water Spraying Jean-Yves Monteau, Jean-François Cournil, Philippe Bransolle, Nasser Hamdani and Alain Le Bail	32
Combined thermodynamic and population balance model of the batch top-spray fluidized bed coating process of inert spheres F.Rousse, Jan G.Pieters and K.Dewettinck	37
FDA/FSIS <i>Listeria Monocytogenes</i> Risk Assessment: Analysis of the Analysis Marcel Zwietering	41
Predicting taste development of cheese using hybrid modelling M. Verschueren, P. de Jong, J. Straatsma, M. Vissers, G. van den Berg	43
A quantitative risk assessment of butyric acid bacteria spores in silage and raw milk Marc Vissers, Frank Driehuis, Meike te Giffel, Peter de Jong and Jos Lankveld.....	46

CONTENTS

Enthalpy of frozen meat from composition data R.G.M. van der Sman	50
---	----

A Micromechanical Approach for Simulating Plant Tissue Jimmy Loodts, Engelbert Tijsskens and Herman Ramon.....	53
--	----

Application of Multivariate Statistical Analysis and Human Expert Knowledge in Fuzzy Logic Modelling of the Multi-Stage High-Pressure Inactivation of Lactococcus lactis ssp. cremoris MG 1363 Klaus V. Kilimann, Christoph Hartmann and Michael G. Gänzle.....	58
---	----

Combining Experimental Data and in Silico analysis to Model the metabolic Networks of Lactobacillus Plantarum Bas Teusink, Frank JH van Enckevort, Arno Wegkamp, Jos Boekhorst, Douwe Molenaar, Jeroen Hugenholtz, Eddy J Smid and Roland J Siezen.....	63
---	----

TOOLS TRAINING AND SIMULATION

The Use of optimal Experimental Design Concepts in Bioprocess Modelling Kristel Bernaerts, Ilse Smets, Kristel Gysemans, Astrid Cappuyns and Jan F. Van Impe	69
--	----

Constrained Optimization of Piecewise Constant Inputs for Optimal Square Root Model Parameters Estimation Kristel Gysemans, Kristel Bernaerts, Ifor Verhoeven and Jan F. Van Impe.....	75
--	----

Towards the accurate Assessment of Non Loglinear Microbia Survivor Kinetics, Development of a Freeware Userfriendly Tool in the Area of Predictive Microbiology Annemie H. Geeraerd, Vasilis P. Valdramidis and Jan F. Van Impe.....	82
--	----

Improvement of the Cooperation between the Operator and the Process: An experimental Approach of the Imperfection Impact on a Cheese Ripening Fuzzy Model Irina Ioannou, Nathalie Perrot, Gilles Trystram and Gilles Mauris	87
---	----

PROCESS AND PLANT CONTROL

Modelling and Control of Evaporators and Spray Dryers Peter Cunningham, Barry O'Connor and Donal J. O'Callaghan	95
---	----

NIZO Premia and Premic Off-Line and In-Line Product and Process Control Tools for the Food Industry F. Smit, J. Straatsma, M.M.M. Vissers, M. Verschueren and P. de Jong	100
--	-----

CONTENTS

Towards an on-line measurement of the purity of cane sugar factory juices: a neural network approach

Teddy Libelle, Michel Benne, Brigitte Grondin-Perez, Jean-Pierre Chabriat 103

Modeling and Control of a pH neutralization process: fuzzy clustering with a Gustafson-Kessel algorithm and Takagi-Sugeno type of fuzzy model

S. Beyou, B. Grondin-Perez, M. Benne and R. Lorion 107

CHALLENGES IN MODEL APPLICATIONS

Management of innovation in the life science industries

Felix Janszen 113
