

Preface	VII
Scientific Programme	1
Author Listing	177

KEYNOTE

Complex Systems in Food Science: Human Factor Issues Evelyne Lutton, Alberto Tonda, Nadia Boukhelifa and Nathalie Perrot	5
------------------------------------------------------------------------------------------------------------------------------------------	----------

TUTORIAL PAPERS

Predictive Modelling under Dynamic Conditions in Food Processing Environments Vasilis P. Valdramidis, Kirk Dolan, Dries Telen and Jan F.M. Van Impe	11
Parameter Estimations in Predictive Microbiology: How to build Statistically Sound Secondary Models Simen Akkermans, Filip Logist and Jan F.M. Van Impe	14

RECENT EU-INITIATIVES IN FOOD MODELLING AND SIMULATION

FoodMC: A European COST Action on Food Modelling Alberto Tonda	23
Q-Safe Erasmus Training Programme – Teaching and Student Learning Experiences Enda Cummins, Jeanne-Marie Membré, Jan Van Impe, Kostas Koutsoumanis, Serafim Bakalis, Aludena Hospido, Ismael Martínez Lede and Vasilis Valdramidis	26

Q-SAFE QUANTITATIVE TOOLS FOR SUSTAINABLE FOOD & ENERGY IN THE FOOD CHAIN

Effect of Ultrasound on Recovery Kinetics of <i>Alicyclobacillus Acidoterrestris</i> Spores Myrsini N. Kakagianni, Konstantinos P. Koutsoumanis and Vasilis P. Valdramidis	33
--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----------

CONTENTS

Artificial Neural Networks as a Tool to predict the Migration of Silver from Antimicrobial Nano-Coated LPDE Films

Joseph C. Hannon, Enda Cummins, Joseph P. Kerry, Malco Cruz-Romero, Shafrina Azlin-Hasim and Michael Morris38

Second Order Monte Carlo Simulation to Characterise the Health Impact of Different Infant Feeding Strategies

Géraldine Boué, Sandrine Guillou, Jeanne-Marie Membré, Jean-Philippe Antignac, Bruno Le Bizec and Enda Cummins.....44

Modelling the Mycelium Formation Ability of *Penicillium Expansum* as a Function of Propolis pH ad NaCl

Arianne Muscat, Ioannis Mourtzinou, Maria Gougouli, Vasilis Valdramidis and Konstantinos P. Koutsoumanis49

Modelling of a Nutrient Feedback Mechanism during Human Digestion of Carbohydrates

Tom Moxon, Philippe Nimmegeers, Dries Telen, Jan Van Impe and Serafim Bakalis53

MODELLING IN FOOD ENGINEERING AND FOOD TECHNOLOGY

Modeling the Drying of a Food Processing Plant

Logan Lecoq, Onrawee Laguerre, Evelyne Derens, Hong-Minh Hoang and Denis Flick61

Prediction of Material Behaviour and Flows in Industrial Food Processing

Benoit Debbaut66

Model Based Prevention of Powder Build-Up in Spray Driers, including Visualization

Kevin N. van Koerten, Martijn B. Fox , Han Straatsma, Maykel Verschueren and Coen Akkerman71

SPATIOTEMPORAL PREDICTIVE MODELLING IN FOODS

Individual Based Modeling of Microbial Colony Dynamics on Food Surfaces in a Parallel Simulator

Ignace Tack, Fabrice Harrouet, Gireg Desmeulles, Filip Logist and Jan F.M. Van Impe.....77

Towards an individual-based Simulator of the Yeast *Saccharomyces Cerevisiae* for the Food Science with predictive Capabilities

Xavier Portell and Marta Ginovart83

Modelling Spatiotemporal Dynamics in a Food Matrix initiated by Injected Starter Cultures
 Thorsten Stefan88

3D Individual Based Model for Bacteria Growth and Spatial Interactions: Application to the Case of *Listeria Monocytogenes* and *Carnobacterium Piscicola*
 Fabrice Harrouet, Gireg Desmeulles, Pascal Redou and Laurent Gaubert92

FOOD PRODUCT AND PROCESS MONITORING

Role of Differential Plating Methods in the Detection of Sublethal Injury Induced to *Listeria Monocytogenes* by Natural Plant Extracts
 Davy Verheyen, Maria Baka, Estefanía Noriega and Jan F.M. Van Impe99

Application of Near-Infrared Transmission (NIT) Spectroscopy for Determination of Fat and Protein in Quinoa (*Chenopodium Quinoa Willd*) Grains
 Christian Encina-Zelada, José A. Teixeira, Jorge Pereda, Luz Gómez-Pando, Martha Ibañez, Vasco Cadavez and Ursula Gonzales-Barron.....104

Explorative MS-Fingerprinting to assess Novel Applications of Non-Thermal Plasma in Food Research
 Jeroen Vandamme and Jim Van Durme109

PREDICTIVE FOOD MICROBIOLOGY

Development of Vacuum-Packed Meat-Based Model Systems for the Evaluation of the Food Intrinsic Complexity on *Listeria Monocytogenes* Growth at Refrigeration and Abuse Temperatures
 Maria Baka, Estefanía Noriega, Kristof Van Langendonck and Jan F.M. Van Impe117

The Role of Food Intrinsic Factors on the Inactivation Efficacy of Cold Atmospheric Plasma
 Cindy Smet, Estefania Noriega, Ioannis Matsoukas, Frederik Rosier, James Walsh, Vasilis Valdramidis and Jan Van Impe122

Predictive modelling of the Growth of *Listeria* as influenced by the Antimicrobial Activity of *Lactococcus Lactis* in Liquid and Solid State
 Parika Ale, Simy Paul, Jorge Gutierrez and Eirini Velliou127

CONTENTS

Development of Fish-Based Model Systems for Kinetic Studies of Foodborne Pathogens

Davy Verheyen, Maria Baka, Torstein Skåra, Stijn Vercruyssen, Nicolas Cornette and Jan F.M. Van Impe130

MODELLING IN FOOD PRODUCTION

Coupling Fluid Flow, Heat Transfer and Food Product Transformation in a Tubular Heat Exchanger, including the Influence of Curved Sections

Artemio Plana-Fattori, Emilie Auger, Christophe Doursat and Denis Flick.....135

Classifying Beef Carcasses according to Meat Quality using Animal/Carcass Characteristics and pH/Temperature Decline Descriptors Early *Post Mortem*

Cristina Xavier, Ursula Gonzales-Barron, Vasco Cadavez and Alexandra Müller143

Optimization of a Thermal Process with Reciprocal Agitation by computational modelling

Dagbjørn Skipnes, Ferruh Erdogdu, Mustafa Tutar, Sigurd Øines, Igor Barreno and Trond Løvdal.....149

Reduction of 3 Monochloropropane 1, 2-Diol (3-MCPD) Esters during Palm Oil Refining

Chin Ping Tan and Musfirah Zulkurnain.....152

Sustainable Production Logistics-Location Problem for Reusable Transport Packages in Multi-food Production Network with Production Cycle

Di Zhang155

SOFTWARE TOOLS

FoodRisk-Labs Open Source Software Tools Supporting Food Safety Decision Making

Matthias Filter, Christian Thöns, Carolina Plaza Rodriguez, Miguel de Alba Aparicio, Alexander Falenski, Annemarie Käsbohrer, Bernd Appel and Armin A. Weiser163

Microhibro: An On-Line Tool for Quantitative Microbial Risk Assessment in Foods

Fernando Perez-Rodriguez, Antonio Valero, Elena Carrasco, Denisse Posada-Izquierdo, Rosa Maria Garcia-Gimeno and Gonzalo Zurera..165

LATE PAPER

**Erasmus Mundus Joint Master Degree in Food Science, Technology
and Business**

Monika Polanska, Jan Van Impe and Guido Aerts.....171
