

<b>Preface</b> .....	<b>VII</b>
<b>Scientific Programme</b> .....	<b>1</b>
<b>Author Listing</b> .....	<b>261</b>

## KEYNOTE SPEAKERS

<b>Working at Thinking About Playing or A year in the life of a Games AI Programmer</b> Simon L. Tomlinson, Andrew Davies and Stephane Assadourian .....	<b>5</b>
<b>Computer Games: A Paradigm for New Media and Arts in the XXI Century</b> Stéphane Natkin.....	<b>13</b>

## DEVELOPMENTS IN GAMES

<b>A DSP-Based 3-D Sound Synthesis System for Moving Sound Images</b> Kosuke Tsujino, Atsuhito Shigiya, Tomonori Izumi, Takao Onoye, Yukihiro Nakamura and Wataru Kobayashi .....	<b>23</b>
<b>A Review of Eye-Tracking and Usability in Computer Games</b> Michael Allen, Norman Gough, Quasim Mehdi and Brian Wink.....	<b>26</b>
<b>An Actor Architecture to Develop Games for Blind Children</b> Cyrille Bertelle, Antoine Dutot, Sylvain Lerebourg, Damien Olivier and Guillaume Prévost.....	<b>31</b>
<b>Emergent Modelling of Physics for Games Development</b> Lubo Jankovic .....	<b>34</b>

## STORYTELLING AND NATURAL LANGUAGE PROCESSING

<b>A Multiplayer Case Based Story Engine</b> Chris R. Fairclough and Pádraig Cunningham.....	<b>41</b>
<b>Mimicry: Another Approach for Interactive Comedy</b> Ruck Thawonmas, Hiroki Hassaku and Keisuke Tanaka .....	<b>47</b>
<b>An Inference Methodology for Reasoning About Visual Information for a Virtual Environment</b> Xin Zeng, Quasim Mehdi and Norman Gough .....	<b>53</b>

# CONTENTS

## GAMES ENGINES, MODELLING AND ANIMATION

<b>Animating 9-Link Brachiation with Heuristic Control</b> Zheng Zhang and Tony Kai Yun Chan .....	61
<b>Real-Time Motion Generation Based on Marionette Metaphor Using Two Analog Joysticks</b> Koji Chadou, Yoshihiro Okada and Koichi Nijima .....	69
<b>Prototyping a Simple Layered Artificial Engine for Computer Games</b> Börje Karlsson .....	74
<b>Optimising RETE for Low-Memory Multiagent Systems</b> Neil Madden .....	77
<b>Petri Net Modelling for the Analysis of the ordering of Actions in Computer Games</b> Stéphane Natkin and Liliana Vega .....	82

## LEARNING TECHNOLOGIES

<b>On-Line Adaptation of Game Opponent AI in Simulation and in Practice</b> Pieter Spronck, Ida Sprinkhuizen-Kuyper and Eric Postma .....	93
<b>Anticipating Opponent Behaviour Using Sequential Prediction and Real-Time Fuzzy Rule Learning</b> Pedro Demasi and Adriano J. de O. Cruz.....	101
<b>Learning of AI Players From Game Observation Data</b> Stephen J. McGlinchey .....	106
<b>A Web-Based Game for Supporting Game-Based Learning</b> Olga Dziabenko, Maja Pivec, Christos Bouras, Vaggelis Igglesis, Vaggelis Kapoulas and Ioannis Misedakis .....	111
<b>Combining Self Organizing Maps and Multilayer Perceptrons to Learn Bot-Behavior for a Commercial Game</b> C. Thureau, C. Bauckhage and G. Sagerer .....	119

## AGENT ONTOLOGY AND ARCHITECTURE

<b>Ontology for Perception in Cognitive Agents and Synthetic Environments</b> Hussam Suliman, Quasim Mehdi and Norman Gough .....	127
--	-----

<b>Multi-Agent Based Modelling: from Social Simulation to Real Time Strategy Games</b>	
Marco Remondino .....	135

<b>MHiCS, a Modular and Hierarchical Classifier Systems Architecture for Bots</b>	
Gabriel Robert and Agnès Guillot.....	140

## 3-D GRAPHICS

<b>Current Depth of Field Algorithms and Techniques for Games</b>	
Daniel Rhodes, Richard Cant and David Al-Dabass.....	147

<b>3D Scene Generation System and Its Intuitive Interface</b>	
Yoshiaki Akazawa, Yoshihiro Okada and Koichi Nijima .....	152

<b>A New Depth of Field Algorithm With Applications to Games</b>	
Daniel Rhodes, Richard Cant and David Al-Dabass.....	157

## AGENT BEHAVIOURS

<b>Behaviour Selection Using Neural Networks</b>	
Paul Thompson.....	165

<b>Automatic Acquisition of Actions for Animated Agents</b>	
Adam Szarowicz, Marek Mittmann, Paolo Remagnino and Jaroslaw Francik.....	170

<b>A Model for Creativity in Creature Generation</b>	
Paulo Ribeiro, Francisco C. Pereira, Bruno Marques, Bruno Leitão and Amílcar Cardoso .....	175

<b>A System for Creating Simple Character Behaviours</b>	
Stefan M. Grünvogel and Stephan Schwichtenberg.....	180

## ALGORITHMS FOR ROUTING AND FLIGHT SIMULATION

<b>Directional Extensions of Seek Steering Behavior</b>	
Michal Jakob .....	187

<b>Robot Rescue: A Rescue Service Based on Dynamic Routing</b>	
Leon J.M. Rothkrantz, Bogdan Tatomir and Luca Porzio .....	192

<b>Fast Marching and Fast Driving: Combining Off-Line Search and Reactive A.I.</b>	
Daniel Livingstone and Robert McDowell .....	197

## CONTENTS

### **A Rule Based and Probabilistic System for a Situation Recognition in a Flight Simulator**

Patrick A.M. Ehlert, Quint M. Mouthaan and Leon J.M. Rothkrantz ..... 201

## MOBILE AND WIRELESS GAMES

### **The Design and Performance of a Receiver Initiated Event Delivery Synchronization Service for Interactive Multiplayer Games**

Stefano Ferretti and Marco Roccetti..... 211

### **A Generic Architecture for Multiplatform Wireless Game Development**

Alexandre Damasceno, Börje Karlsson, Danielle Rousy D. da Silva ..... 219

### **Game Design for Wireless Devices**

Börje Karlsson, Danielle Rousy D. da Silva and Alexandre Damasceno ..... 222

### **Computer Vision Based Interaction Techniques for Mobile Games**

Christian Reimann, Volker Paelke and Dirk Stichling..... 227

## GAME OF GO

### **Genetic Search Techniques for Line Play Generation in the Game of GO**

Julian Churchill, Richard Cant and David Al-Dabass..... 233

### **A General Framework for Vision Based Interactive Board Games**

Jinchang Ren, Peter Astheimer and Ian Marshall ..... 238

### **Towards Multi-Objective Game Theory – With Application to Go**

A.B. Meijer and H. Koppelaar..... 243

## LATE PAPER

### **Rapid Application Development of Games for Undergraduate and Postgraduate Projects Using DirectX**

Stuart Slater ..... 253
