CONTENTS

Preface .................................................................................................................. IX
Scientific Programme .......................................................................................... 1
Author Listing ...................................................................................................... 95

GAME METHODOLOGY

Explorations in Player Motivations: Game Mechanics
Barbaros Bostan and Ugur Kaplancali .................................................................. 5

Psychologically Verified Player Modelling
Giel van Lankveld, Sonny Schreurs and Pieter Spronck ................................. 12

An Approach to providing Feedback at the Design Phase in Game Authoring Tools
Fergal Costello and Colm O’Riordan ................................................................. 20

GAME GRAPHICS

Rendering Water and Land Interaction using a Spring System
Yifan Sui and Andrew Davison ........................................................................... 25

Responsive Real-Time Simulation of Ground Vegetation for Games
Jens Orthmann, Christof Rezk Salama and Andreas Kolb ............................... 30

Towards Image Based Rendering in Computer Games
Christof Rezk-Salama and Severin Todt ............................................................ 38

OM-LINE GAMING

The Profi League Continues – An Online Gaming Community for Professional Players
Michael Ehret, Tobias Fritsch and Benjamin Voigt ........................................... 47

Analysis of User Trajectories Based on Data Distribution and State Transition: a Case Study with a Massively Multiplayer Online Game Angel Love Online
Ruck Thawonmas, Junichi Oda and Kuan-Ta Chen .......................................... 56

EDUCATIONAL GAMING

Recommendations to Make Game Engines more accessible to Educators and Students
Penny de Byl ....................................................................................................... 63
CONTENTS

Math Games: An Alternative (Approach) to Teaching Math  
Anton Eliens and Zsora Ruttkay ................................................................. 68

GAMING FOR REAL WORLD ENGINEERING ENVIRONMENTS

Detecting Stress using Eye Blinks during Game Playing  
M. Haak, S.Bos, S.Panic and L.J.M.Rothkrantz ............................................. 75

Setting up a Virtual Factory Based on 3D Internet Platforms  
Stefan Seitz, Marco Hermann and Daniel-Percy Wimpff ............................ 83

Modular Technology in the Generation of Large Virtual Environments  
Carlota Tovar, Ginés Jesús Jimena and Jose María Cabanellas ................. 88
